# Tools to realize spatiotemporal analysis in the humanities

## SEKINO, Tatsuki

## (Research Institute for Humanity and Nature)

### Spatiotemporal?

#### Spatiotemporal analysis tools

#### **Spatial information**

There are visual analysis tools such as GIS

#### **Temporal information**

Although there are tools for chronological tables and time series analysis, there are few tools for visual analysis like GIS

TimeMap, ArcGIS Tracking Analyst

#### for spatial information with temporal data

#### To realize spatiotemporal analysis...

Analysis method for temporal information must be improved at the same level of GIS Visual analysis tool for temporal information is required

#### In this presentation Introduction of •Outline of HuTime •Its cooperative capabilities with GIS tool (HuMap)

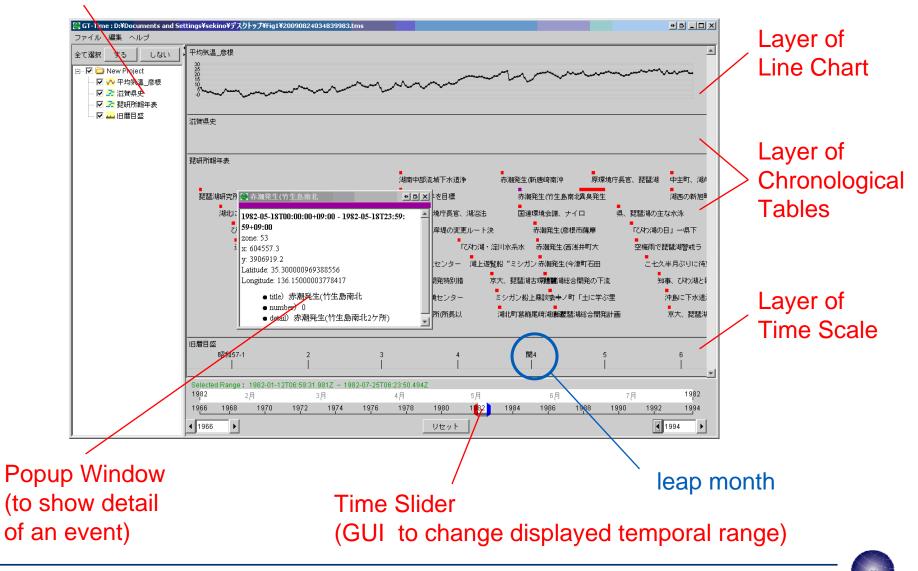

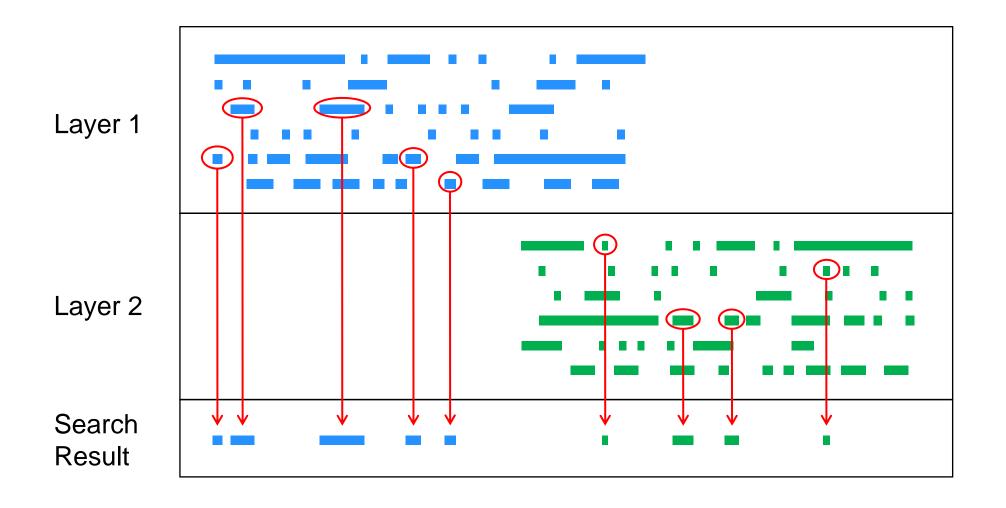

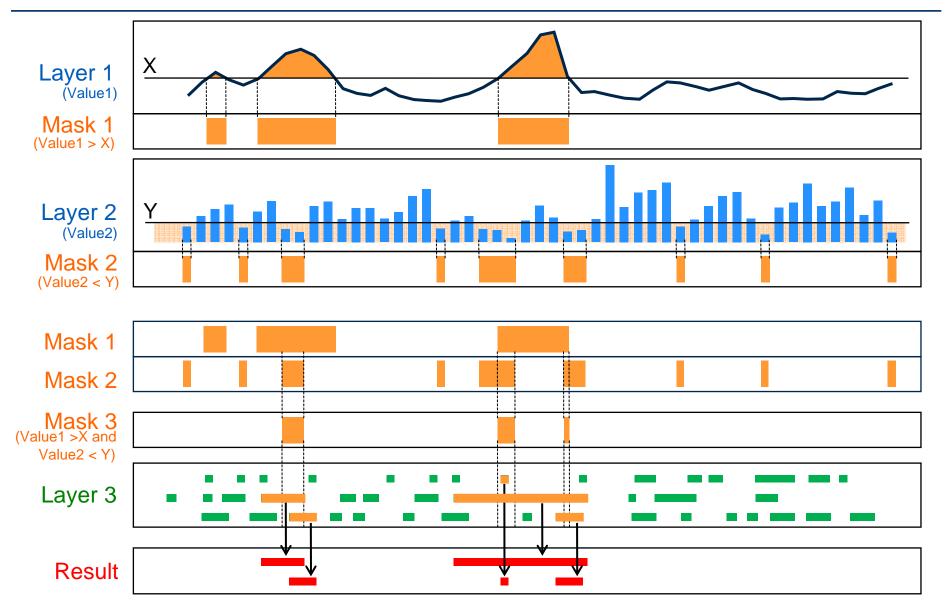

### HuTime – A tool for visual analysis of temporal information

List of Layers

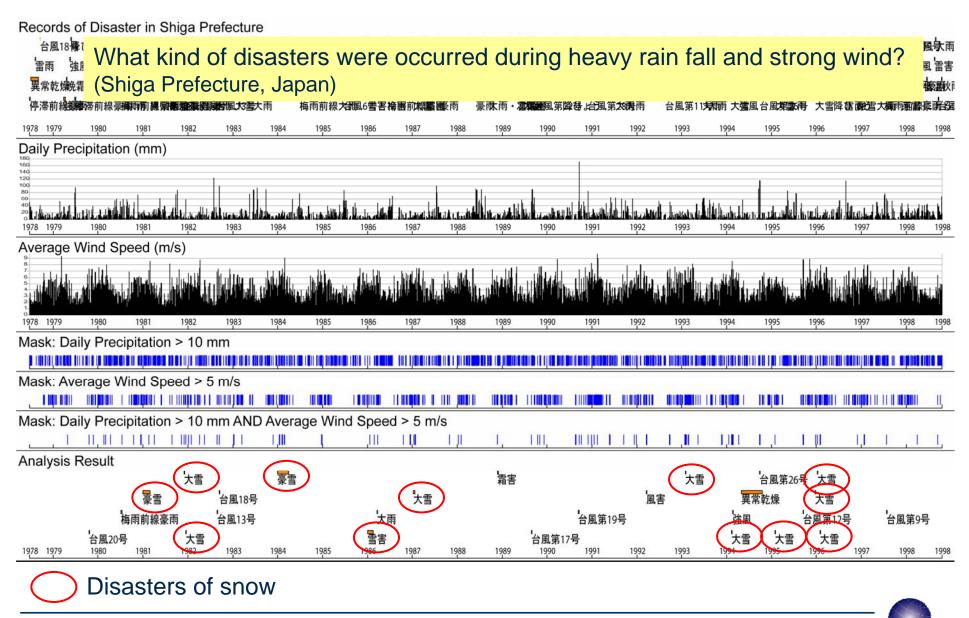

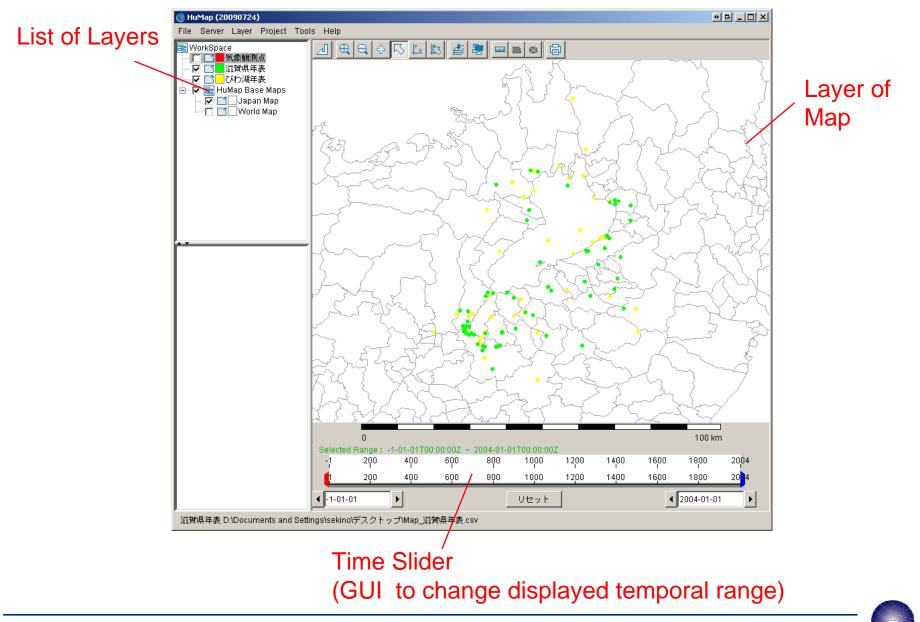

### Temporal information analysis using masks in HuTime

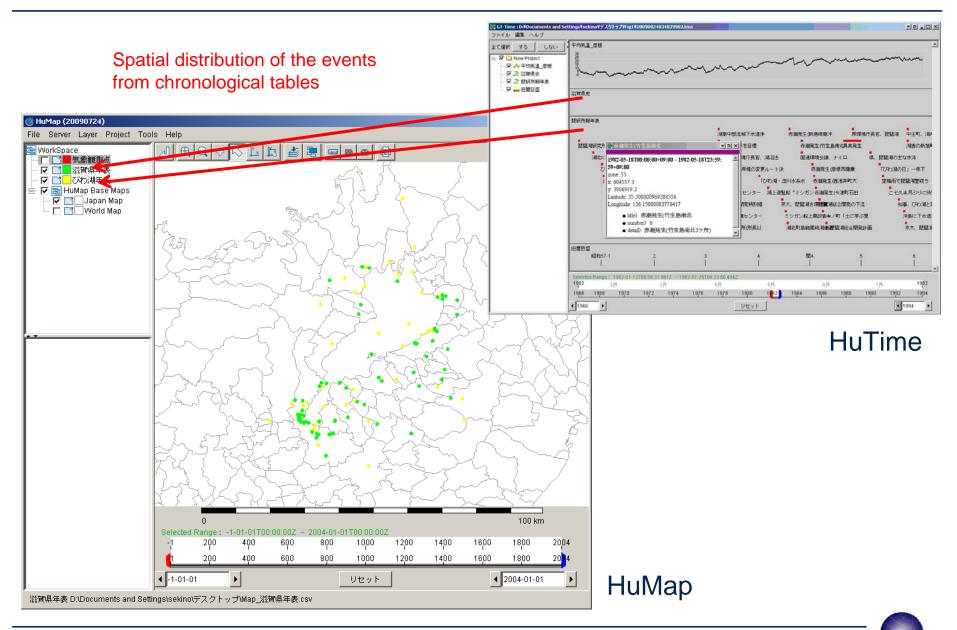

### Example of temporal analysis using masks in HuTime

### HuMap – A tool for spatial information analysis

## Cooperative capabilities of HuTime and HuMap

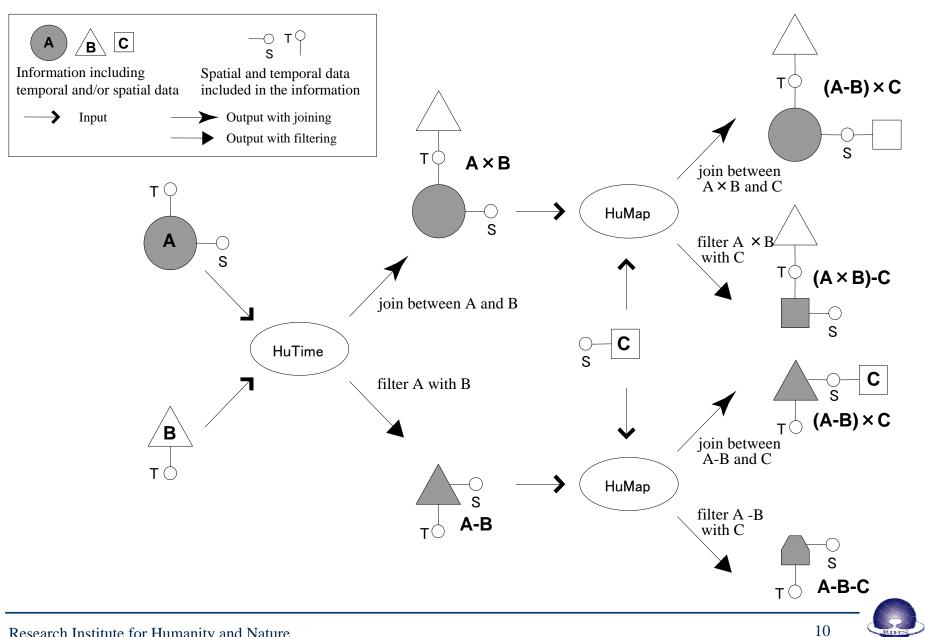

滋賀県災害誌 **HuTime** 大雨 台風第28号 台風第19号 大雨 大雪 Chronological 土砂くずれ 風害 Table 隆ひょう 食すべり **氯鐵道列車衝突事故** of Disasters 台風第10号 梅雨前線停滞による災害 台風第17号 大雨 台風第14号 台風第11号 豪雨 大雨 in Shiga Prefecture, 台風第22号 台風第19号 落雷 1992 1993 Japan 1989 1990 991 **Disaster of** Typhoon (11-20 Sep 1990) Amount of damages to rivers (million yen) 0-10 HuMap 10-100 100-1,000 **Spatial Distribution** 1,000-10,000 of Damages no data

9

Linkage between temporal and spatial information in HuTime and HuMap

### The use of HuTime conjunction with HuMap

Research Institute for Humanity and Nature

### Conclusion and future issues

#### HuTime

- Visual analysis for temporal information
- Spatiotemporal analysis by its cooperative capabilities with HuMap

#### Usage of HuTime and HuMap

- Spatiotemporal analysis tool
- Data finding aid

#### Future issues

Accumulation of basic temporal data

- Basic chronological tables (= basic maps for spatial information)
- Dictionary of common event names (= gazetteer for spatial information)
