主旨: [SPAM] Old ArcGIS Online Tiling Scheme to Be Discontinued Soon
重要性: 低

Switch to Web Mercator Services to Get the Most Current Content

In [December 2009](#), Esri published a new set of ArcGIS Online services in [Web Mercator Auxiliary Sphere](#) (WKID 102100). These services replaced an older set of services in the ArcGIS Online tiling scheme in GCS:WGS84, which were moved in June 2011 to mature support status.

This e-mail is to inform you that we are no longer updating GCS:WGS84 services and will be retiring them early as spring 2012. Before the WGS84 services are no longer available, we want to give you ample opportunity to migrate to the newer web Mercator services, if you haven't done so already.

The levels of support and the current status of different services are described in [ArcGIS Online Services Support Status](#) [PDF]. This document also includes answers to some frequently asked questions such as how to find out which services you are currently using, which services you should switch to, and which services are being removed from the subscriptions.

If you have additional questions, please feel free to [contact us](#). You can also subscribe to the [ArcGIS Online blog](#) to stay current with the latest news and developments.
